## Working Papers

6. The Informational Role of Online Recommendations: Evidence from a Field Experiment on MovieLens (w/ Duarte Gonçalves, Ruoyan Kong, Daniel Kluver, Joseph Konstan) [Draft](#)

*Short Abstract:* We conduct a longitudinal field experiment on the movie recommendation platform MovieLens where we randomize the set of recommended movies and elicit beliefs about unseen movies. We use the data to decompose the influence that online recommendations have on consumption choices in terms of their informational and product discovery value.

7. Evaluating The Impact of Privacy Regulation on E-Commerce Firms: Evidence from Apple's App Tracking Transparency (w/ Yeon-Koo Che, Brett Hollenbeck, Maximilian Kaiser, Daniel McCarthy) [Draft](#)

*Revision Requested, Management Science*

*Short Abstract:* We show that Apple's App Tracking Transparency Policy degraded the quality of targeted advertisements on Meta and led to medium-term reductions in revenues and customer acquisition for more Meta-dependent firms.

8. Competing Bandits: The Perils of Exploration under Competition, [Draft](#)  
(w/ Yishay Mansour, Alex Slivkins, Steven Wu)

*Minor Revision Requested (Resubmitted), ACM Transactions on Economics and Computation*

*Short Abstract:* We study the tension between exploration and competition and ask whether competition incentivizes the adoption of better exploration algorithms. We highlight how our results relate to the role of data in the first-mover advantage in the digital economy.
